STUDIO BRIEF

RETHINKING.LOGISTICS EXPLORED NEW WAYS OF THINKING ABOUT LOGISTICS AND WAREHOUSE BUILDINGS IN THE CITY. INSTEAD OF SEEING INDUSTRIAL BUILDINGS AS ISOLATED ZONES, THE PROJECTS INVESTIGATED HOW THEY COULD BECOME MORE CONNECTED TO PUBLIC LIFE, THE ENVIRONMENT, AND EVERYDAY URBAN EXPERIENCE.

IN COLLABORATION WITH RAMBOLL, HENNING LARSEN, AND PANATTONI, THE STUDIO WORKED WITH REAL ISSUES RELATED TO CONTEMPORARY LOGISTICS DEVELOPMENT. THE PROJECTS WERE GUIDED BY MEASURABLE DATA SUCH AS ENERGY PERFORMANCE, CARBON IMPACT, AND BIODIVERSITY.

THROUGH RESEARCH, PARAMETRIC TOOLS, AND DISCUSSIONS WITH PROFESSIONALS, THE STUDIO SEARCHED FOR WAYS TO DESIGN LOGISTICS ARCHITECTURE THAT IS BOTH EFFICIENT AND ENVIRONMENTALLY RESPONSIBLE, WHILE ALSO CREATING A BETTER RELATIONSHIP BETWEEN INDUSTRY AND THE PUBLIC.

OTOVICE, KARLOVY VARY CZECH REPUBLIC

OTOVICE WAS FIRST MENTIONED IN HISTORICAL RECORDS IN 1325 AND ORIGINALLY DEVELOPED AS A SMALL AGRICULTURAL SETTLEMENT NEAR KARLOVY VARY. OVER TIME, THE AREA GRADUALLY EXPANDED THROUGH FARMING, LOCAL CRAFT PRODUCTION, AND LATER INDUSTRIAL ACTIVITIES CONNECTED TO THE WIDER DEVELOPMENT OF THE KARLOVY VARY REGION.

DURING THE 19TH AND 20TH CENTURIES, OTOVICE WAS INFLUENCED BY INDUSTRIAL GROWTH, PARTICULARLY THROUGH KAOLIN AND BROWN COAL MINING IN THE SURROUNDING LANDSCAPE. THE PROXIMITY TO KARLOVY VARY AND THE DEVELOPMENT OF INFRASTRUCTURE CONTRIBUTED TO THE GROWTH OF HOUSING, INDUSTRY, AND TRANSPORTATION NETWORKS WITHIN THE AREA.

TODAY, OTOVICE IS CHARACTERIZED BY A DIVERSE URBAN STRUCTURE WHERE RESIDENTIAL AREAS, INDUSTRIAL ZONES, LOGISTICS, AND EVERYDAY PUBLIC FUNCTIONS EXIST CLOSELY ALONGSIDE ONE ANOTHER, REFLECTING THE LAYERED HISTORICAL DEVELOPMENT OF THE SETTLEMENT.

OTOVICE, KARLOVY VARY CZECH REPUBLIC

EVEN THOUGH OTOVICE HAS A VERY DIVERSE URBAN STRUCTURE, WHERE RESIDENTIAL AREAS, INDUSTRY, MUNICIPAL SERVICES, AND MANUFACTURING EXIST CLOSE TO EACH OTHER, THERE ARE VERY FEW PLACES THAT ENCOURAGE PEOPLE TO STAY, MEET, OR SPEND TIME IN THE AREA. MOST PEOPLE LEAVE IMMEDIATELY AFTER FINISHING THEIR PURPOSE, DESPITE THE FACT THAT THERE IS A CONSTANT DAILY FLOW OF PEOPLE MOVING THROUGH THE SITE.

AT THE SAME TIME, OTOVICE ALREADY CONTAINS MANY IMPORTANT FUNCTIONS THAT NATURALLY ATTRACT PEOPLE: HEALTHCARE, MUNICIPAL SERVICES, INDUSTRIAL BUSINESSES, STORAGE, SMALL PRODUCTION, AND TRANSPORT CONNECTIONS. RATHER THAN SEEING THIS MIX OF FUNCTIONS AS A PROBLEM, THE PROJECT UNDERSTANDS IT AS A POTENTIAL FOUNDATION FOR A NEW TYPE OF INDUSTRIAL ENVIRONMENT.

CONCEPT

THE PROPOSAL THEREFORE INTRODUCES THE CONCEPT OF “VISIBLE INDUSTRY,” WHERE RETAIL, SMALL WORKSHOPS, CAFÉS, STUDIOS, AND WAREHOUSE FUNCTIONS ARE MERGED INTO ONE CONNECTED URBAN STRUCTURE.

INSTEAD OF HIDING PRODUCTION BEHIND CLOSED WALLS OR FENCES, PARTS OF THE INDUSTRY BECOME VISIBLE THROUGH TRANSPARENT FACADES, OPEN WORKSPACES, AND PUBLICLY ACCESSIBLE ROUTES. THE AIM IS TO CREATE AN ENVIRONMENT WHERE PEOPLE DO NOT ONLY PASS THROUGH THE SITE, BUT ALSO STOP, OBSERVE, INTERACT, AND SPEND TIME THERE.

BEFORE

AFTER

DESIGN

1. LARGE WAREHOUSES

MEDIUM WORKSHOP 2.

3. SMALL SHOP

STRATEGY

1. TRANSFORMING INDUSTRY INTO PUBLIC SPACE

INDUSTRY IS NO LONGER TREATED AS A SEPARATED TECHNICAL ZONE LOCATED ON THE EDGE OF THE SETTLEMENT, BUT AS PART OF EVERYDAY PUBLIC LIFE.

2. VISIBILITY INSTEAD OF SEPARATION

INSTEAD OF HIDDEN WAREHOUSES, PRODUCTION BECOMES VISIBLE THROUGH TRANSPARENT FAÇADES, OPEN WORKSHOPS, AND ACCESSIBLE PUBLIC ROUTES.

3. PRODUCTIVE PROMENADE

A PRODUCTIVE PROMENADE CONNECTS INDUSTRY WITH PUBLIC LIFE THROUGH CAFÉS, WORKSHOPS, SEATING AREAS, AND SMALL PUBLIC-ORIENTED FUNCTIONS.

SMALL ROASTERY, ELEVATION, BEFORE

SMALL ROASTERY, ELEVATION, AFTER

STRATEGY

4. LAYERING DIFFERENT SCALES OF PRODUCTION

LARGE WAREHOUSES, MEDIUM WORKSHOPS, AND SMALL SHOPS ARE COMBINED TO CREATE A MORE DIVERSE AND HUMAN-SCALE URBAN ENVIRONMENT.

5. SOFTENING INDUSTRIAL INFRASTRUCTURE THROUGH LANDSCAPE

LANDSCAPE ACTS AS INFRASTRUCTURE THROUGH TREES, RETENTION PONDS, AND PERMEABLE SURFACES THAT IMPROVE ENVIRONMENTAL QUALITY AND SOFTEN INDUSTRIAL EDGES.

● WAREHOUSE ORIENTED

● WORKSHOP ORIENTED

● COMMUNITY ORIENTED

STRATEGY PLAN

KEY PERFORMANCE INDICATORS

THE PROPOSAL WAS EVALUATED THROUGH A SERIES OF KEY PERFORMANCE INDICATORS (KPIS) COMPARING THE EXISTING CONDITION OF THE SITE WITH THE PROPOSED INTERVENTION. THESE INDICATORS HELP MEASURE THE OVERALL IMPACT OF THE DESIGN ACROSS ENVIRONMENTAL, SPATIAL, AND SOCIAL ASPECTS.

THE RESULTS DEMONSTRATE A CLEAR IMPROVEMENT IN THE QUALITY AND PERFORMANCE OF THE AREA. THE PROPOSAL INCREASES ECOLOGICAL VALUE, IMPROVES PUBLIC SPACE CONDITIONS, STRENGTHENS THE RELATIONSHIP BETWEEN PEOPLE AND INDUSTRY, AND INTRODUCES MORE SUSTAINABLE WATER AND ENERGY STRATEGIES. AT THE SAME TIME, THE KPIS HELP VERIFY THAT THE DESIGN IS NOT ONLY CONCEPTUAL, BUT ALSO MEASURABLE AND PERFORMANCE-ORIENTED.

APPENDIX

Silent Factory

The factory is embedded into the terrain, minimizing its visual presence and allowing the landscape to remain dominant.

Input:

1)

2)

Public Industry

The factory becomes a public interface, where production is made visible and accessible, transforming industry into a shared civic experience.

Input:

1)

2)

Productive Landscape

A symbiosis between production and nature, where industry becomes an active ecological system.

It says: "Industry can be powerful AND responsible"

Input:

1)

2)

Adaptive Framework

The factory is conceived as an open framework that allows continuous adaptation, growth, and transformation over time.

Input:

1)
